WORK EXPERIENCE

AUG 2019 - PRESENT

HEAD OF PRODUCTION
TECH RESOURCE COMPANY

Build the business with my team by working on several projects like CRM, portal, client's website, mobile apps, and other high-end development tasks that were delivered timely and with utmost quality.

- Maintained the current major website of internal brands and added more appealing features.
- Led the team of front-end and back-end developers to ensure efficient and timely workflow.
- Developed a brand new CRM which would improve the efficiency of teams to a great extent.
- Mentored and guided trainees to help them polish their coding skills.
- Worked directly with CEO and COO for a seamless workflow.
- Improved coding of internal and external websites.

WORK EXPERIENCE

AUG 2019 - AUG 2021

HEAD OF PRODUCTION
LEGENDESK, KARACHI

Responsible for creating webpage layouts, writing code, editing website content, and making adjustments based on client feedback. I make sure the final product is visually appealing and user-friendly.

- Establish and enforce practice-wide UX/UI standards for applications, visualizations, and reporting
- Create custom user interfaces and other site assets based on client directions
- Design and Develop multimedia and websites using various technologies
- Conduct competitive assessments and usability evaluations of web-based applications
- Create Interactive prototypes using XHTML, CSS, and JavaScript for usability testing
- Lead all the projects from conceptualization to deliverance and ensure to complete within the deadlines.

2012 - AUG 2019

ASSOCIATE ARCHITECT
AXACT, KARACHI

Designed and developed interactive prototypes and mockups using HTML5, CSS3, and jQuery for future enhancements of the SMB Marketplace website and then implemented them on the live web platform.

- Developed user personas and scenarios to enhance functionality and usability for key audiences
- Integrated social media and other content, along with e-commerce and related services, throughout the user experience
- Utilized an informal agile system to keep development on track in an unstructured, self-motivated environment
- Developed overall concept for improving the user experience within a business webpage, ensuring all interactions are intuitive and convenient for customers
- Conducted test of the completed site to assess user experience
